Members help form IFT section 174
New members 34, 288D, 339
Oilseeds Division 62

"News of the AACC" 28. 68, 134, 172, 206, 258, 307, 338, 406, 459, 492, 525

AACC reports, official
Minutes of 52nd annual business meeting 258
Official reports for 1966 124

AACC reports, unofficial
1967 Annual meeting, Los Angeles 206
Check sample available to overseas members 172
Directors' meetings 134, 492
Mecham named president-elect; Christensen becomes Director .. 172

Abstracts, 52nd annual meeting 100

Alsberg lectureship to W. J. Whelan: announcement 95

Amylograph vs. falling number values compared 332

Amylose packaging film: development 4

Antifirming of bread with heat-stable alpha-amylase 358

Page

Apparatus (see also "Products")
- Amylose packaging film 4
- Viscometer 151
- Current equipment review 387
- Doty Laboratories 514
- Expanded convenience products .. 473
- Falling number determinations 182
- Harris Laboratories, Inc. 330
- Industrial Laboratories Co. 512
- Jacobs-Winston Laboratories 329
- For making full-fat soy flour 81
- Modification of Buhler mill for semolina 164
- Research in dough rheology 185
- Synthetic flavors 266

Atmos 300: stable salt-water suspension of BHA 49

Automation: continuous quality control in grain processing 159

Bakery products
- Conceiving new baked products 469
- Microbial stability of butter-cream-type fillings 63

Baking quality: influence of weathering on mature wheat 86

Baking technology: flour properties for semisweet biscuits 8

Barley: EBC system of reference for barley proteins 326

Blended food products
- Improvements in protein quality in corn-based foods 443
- New milled corn products 438
- Protein-fortified grain products for world use 426

Book notes
- Basic gas chromatography 73
- Chemical formulary, The (Chemical Pub. Co.) 73
- Lang's handbook of chemistry, rev., 10th ed.; compiled and ed. by N. A. Lang and G. M. Forker 498

Book reviews
- Advances in agronomy vol. 18, ed. by A. G. Norman 456
- Advances in chromatography, vols. 2 and 3, ed. by J. C. Giddings and R. A. Keller 168
- Enzymes in food processing, by Gerald Reed, with a contribution by L. A. Underkofler 35
- First International Congress of Food Science and Technology; vol. 2, Biological and microbiological aspects of food, ed. by James M. Leitch 141
- Flavor chemistry, advances in chemistry series No. 56, ed. by Robert F. Gould 524
- Getreide und seine Verarbeitung, Das (The cereals and their processing). I. Teil; by M. Rohrlich and G. Bruckner 488
- Glass electrodes for hydrogen and other cations, ed. by G. Eisenman 488
- Handbook of industrial toxicology, by E. R. Plunkett 214
- Introduction to quantitative ultramicroanalysis, by I. M. Korenman; trans. from Russian by Ronald Belcher 35
- Plant biochemistry, by G. Doby.... 72
- Starke atlas, by J. Seidemann 212
- Symposium on foods: chemistry and physiology of flavors, by H. W. Schultz, E. A. Day, and L. B. Libbey 524
- Techniques for efficient research, by Lewis E. Lloyd 36
- Thermobacteriology in food processing, by C. R. Stumbo 212

Bread and breadmaking (see also **Continuous breadmaking**)
- Effect of irradiation on properties of wheat 253

Page

- Antifirming with bacterial alpha-amylase 358
- Effects of succinylated monoglycerides 400
- Enrichment with Peruvian cottonseed flour (PROTAL) 431
- New X-M rice bran 221
- Protease enzymes: effect on bread flavor 282

Brew system, see **Continuous breadmaking**

Bulgur: wheat based products for world use 446

Butylated hydroxyanisole:
- stable salt-water suspension of BHA 49

Cake and cakemaking
- Flour granulation and starch damage vs. quality of soft wheat flour 245
- Fluid-liquid shortenings; formulation and evaluation 10
- Microbial stability of butter-cream-type fillings 63

Cereal products: expanded convenience products 473

Chesapeake Section celebrates 10th aniversary 175

Continuous breadmaking
- Deleterious effects of NFDM proteins 363
- Effects of succinylated monoglycerides 400
- Fungal enzymes with flour brews .. 394
- Hydrogen peroxide-treated NFDM in CM process 377
- Oxidizing and reducing effects 390
- "State of the art"; developments and trends 352
- Variety breads from CM laboratory unit 382

Convenience foods 466
- Dehydrated products in dry form 481
- Expanded convenience products .. 473
- Refrigerated dough products 478

Cookies: flour properties for semisweet biscuits 8

Corn-based foods
- Improvements in protein quality .. 443
- New milled products including CSM 438

Corn flour—surplus commodity to premium product 505

Cottonseed: edible protein concentrates 40

Cottonseed flour: bread enrichment with PROTAL 431

CSM (corn-soy-milk) mix, see **Blended food products**

Dehydrated products: application in dry form in convenience foods 481

Dough
- Effect of salts of lyotropic series on mixing properties 200
- Refrigerated dough products 478

Dough rheology: Research at Israel Institute of Technology 185

Editorials 3, 39, 79, 145, 181, 217, 265, 317, 349, 417, 465, 501

Enrichment, see **Nutrition, human**

Enzymes
- Antifirming of bread with heat-stable bacterial alpha-amylase .. 358
- Fungal enzymes used with flour brews 394
- Protease enzymes: effect on bread flavor 282

Exhibit directory, 52nd annual meeting 121

Experimental error: estimation and control, in falling number tests 182

Falling number
- Amylograph vs. falling number values compared 332
- Estimation and control of experimental error 182
- Subcommittee report 182

Page

Farinograph studies
- Effect of salts of lyotropic series in NFDM flour dough 200
- Influence of weathering on mature wheat 86

Flavor technology
- List of flavors and ingredients 289
- Methodology of flavor development 292
- The nature of flavor 273
- New world of synthetic flavors 266
- Protease enzymes: effect on bread flavor 282
- Sensory evaluation 273, 296

Flour
- Amylograph vs. falling number values compared 332
- Corn flour — surplus commodity to premium product 505
- Cottonseed flour for bread enrichment 431
- Influence of wheat protein content in evaluation 372
- Maltose: statistical data of Pioneer Section 26
- Method for making full-fat soy flour 81
- Moisture: statistical data of Pioneer Section 23
- Properties for semisweet biscuits .. 8
- Protein: statistical data of Pioneer Section 23
- Reducing microbial population during milling 54

Flour granulation: effect on cakemaking quality of soft wheat flour 245

Food aid programs, see **Nutrition, human**

Food industry: conceiving new baked products 469

Food technology
- Convenience foods 466
- Instantizing process for powdered materials 483
- Refrigerated dough products 478

Geddes Memorial Award to John A. Johnson: announcement 95

Geddes Memorial Lecture 230

Gluten
- Early-generation screening for gluten strength in durum wheat breeding 336
- New light on an old problem 193

Grain: protein-enriched products for world use 426

Grain processing
- Continuous quality control 159
- New X-M rice bran 221
- Solvent extraction milling (rice) .. 219

Granularity: effects studied in wheat variety breads, CM lab unit 382

Hydrogen peroxide treatment of NFDM in CM dough process 377

Incaparina: high-protein foods in Latin America 418

Instantizing: process for powdered materials 483

Interview: Profile in lab management (Otomars Veiss) 88

Irradiation of wheat: effect on storage and breadmaking properties.... 253

Lab management: interview with Otomars Veiss 88

Laboratories: "Profile"
- Bjorksten Research Laboratories, Inc. 491
- Doty Laboratories 514
- Food Technology, Inc. 490
- Harris Laboratories, Inc. 330
- Industrial Laboratories Co. 512
